Introduction

1.1 Explanation about project

The goal of this project is to create an online store based on Printer. E-commerce websites are mostly renowned for the purchasing and selling of any items, including those that are digital. Our assignment was likewise the same as that which was assigned by the institution. This is the group project of the module introduction to Information system. The firm in our project is called Canvas Creation, and it focuses mostly on the purchasing and selling of Printer. There are various type of printer such as Epson, Canon, Kyocera etc.

To make the website user-responsive and user-friendly, we used HTML, CSS, and JavaScript in this project. First, we created the HTML layout. Then, we added CSS and JavaScript .In this our website we have different page which are home page ,Blog Page, Research page , About Us ,Product , Contact US. Home page is all about the description of the contents present on different webpages. Blog page contain a demonstration about how technology has affected daily life and business .Different product with its name and price is included in product page .About Us page include about team member and lastly contact page refers to contact us with Gmail ,phone number and so on.

1.2 Goals and Objective

Since maintaining a user-friendly website is the primary purpose and objective of this website, every visitor may utilize it without doubt or concern. Since no one has time to visit a store to buy anything in the twenty-first century because they are too busy working, this website offers a printer e-commerce platform where customers can order any printer with various brand. Currently, this website primarily targets Nepalese customers because the country is slowly developing in terms of online commerce and its citizens are accustomed to it. This is the finest possibility for a starting firm to expand as quickly as possible. Slowly, if the company in Nepal succeeds, this website will launch in other nations as well because it will already have a basis from which to grow easily in developing nations.

1.3 Use of HTML, CSS, JavaScript

1.3.1 HTML

HTML stands for HyperText Markup Language. It is used to design web pages using a

markup language. HTML is a combination of Hypertext and Markup language. Hypertext defines the link between web pages. A markup language is used to define the text document within the tag which defines the structure of web pages. This language is used to annotate (make notes for the computer) text so that a machine can understand it and manipulate text accordingly. Most markup languages (e.g. HTML) are human-readable. The language uses tags to define what manipulation has to be done on the text (GreekofGreek n.d.).

1.3.2 CSS

Cascading Style Sheets, fondly referred to as CSS, is a simple design language intended to transform the presentation of a Web Pages as well as many ostensibly non web environments.

CSS handles the look and feel part of a web page. Using CSS, you can control the color of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colors are used, layout designs, variations in display for different devices and screen sizes as well as a variety of other effects.

CSS is easy to learn and understand but it provides powerful control over the presentation of an HTML document. Most commonly, CSS is combined with the markup languages HTML or XHTML (Tutorialspoint n.d.).

1.3.3 JavaScript

JavaScript is a dynamic programming language that's used for web development, in web applications, for game development, and lots more. It allows you to implement dynamic features on web pages that cannot be done with only HTML and CSS.

Many browsers use JavaScript as a scripting language for doing dynamic things on the web. Any time you see a click-to-show dropdown menu, extra content added to a page, and dynamically changing element colors on a page, to name a few features, you're seeing the effects of JavaScript (FREECODECAMP n.d.).

1.4 VERDICT

To provide customers with speedy service, Printer, a Nepal-only online retailer, created this website. Canvas Creation cares about customer pleasure. With the guidance of our teacher, our group is creating this website in the hopes that we will meet all the requirements.

2. Discussion and Analysis

2.1 Selected Text Editor

2.1.1 Vs Code

Visual Studio Code combines the simplicity of a source code editor with powerful developer tooling, like IntelliSense code completion and debugging.

First and foremost, it is an editor that gets out of your way. The delightfully frictionless edit-build-debug cycle means less time fiddling with your environment, and more time executing on your ideas.

By using VS code, we can write the code for HTML, CSS, JavaScript, Python and many more. We utilized VS Code as a group for the coding portion since it is simple to use. This is not to say that other text editors are difficult, but according to our group, we used VS Code before this course and thus everyone was accustomed to it (visualstudiocode n.d.).

2.2 Selected Tools for Wire frame

2.2.1 Balsamiq wireframe

Balsamiq Wireframes is a user interface design tool for creating wireframes (sometimes called mockups or low-fidelity prototypes).

You can use it to generate digital sketches of your idea or concept for an application or website, to facilitate discussion and understanding before any code is written. The completed wireframes can be used for user testing, clarifying your vision, getting feedback from stakeholders, or getting approval to start development (balsamiq n.d.).

2.3 Page used on website

2.3.1 Home page

3. Testing

3.1 Test 1

Test Number	1
Objective	To check whether the about us page login form works with the JavaScript or not
Action	The login page was empty and clicked on submit.
Expected result	To get a message when submit button is clicked.
Actual result	A message was shown.
Conclusion	Test successful

Table 1: Test 1

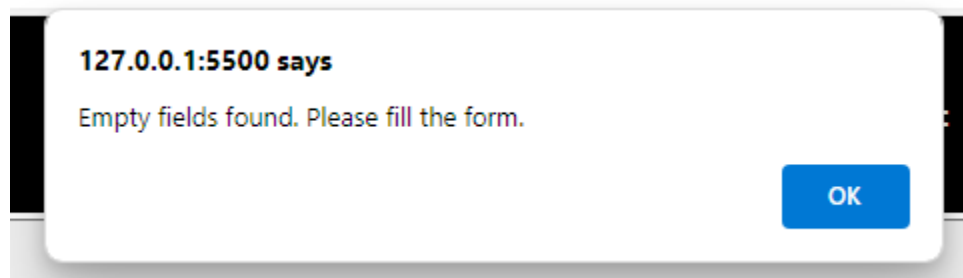

Figure 8: Output of Test 1

3.2 Test 1

Test Number	2
Objective	The test was to check the hover effect in header part
Action	We need click on page name such as home ,product etc.
Expected result	It nedd to turn in green whenever we click.
Actual result	Turn in green color
Conclusion	Test successful

.Table 2:Test 2

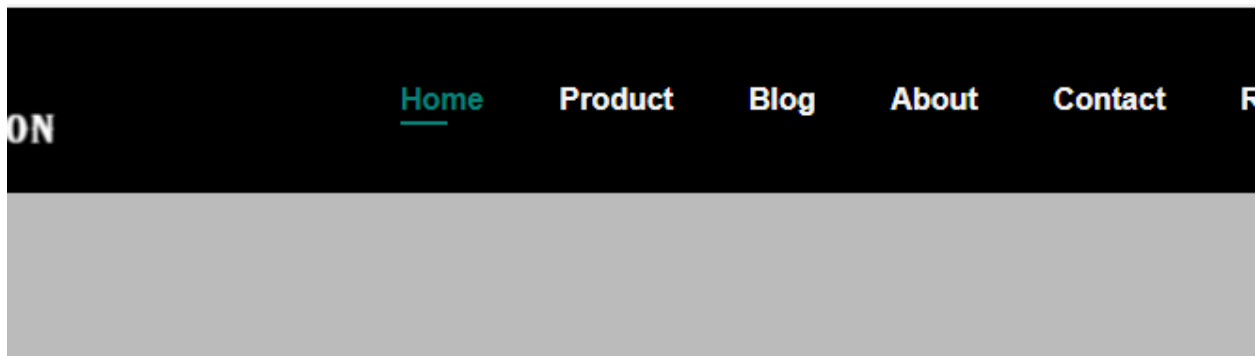

Figure 9:Output of Test 2

3.3 Test 3

Test Number	3
Objective	This is the test for home page it need to show text.
Action	Click in card.
Expected result	Show text inside box
Actual result	Text was shown
Conclusion	Test Successful

Table 3:Test 3

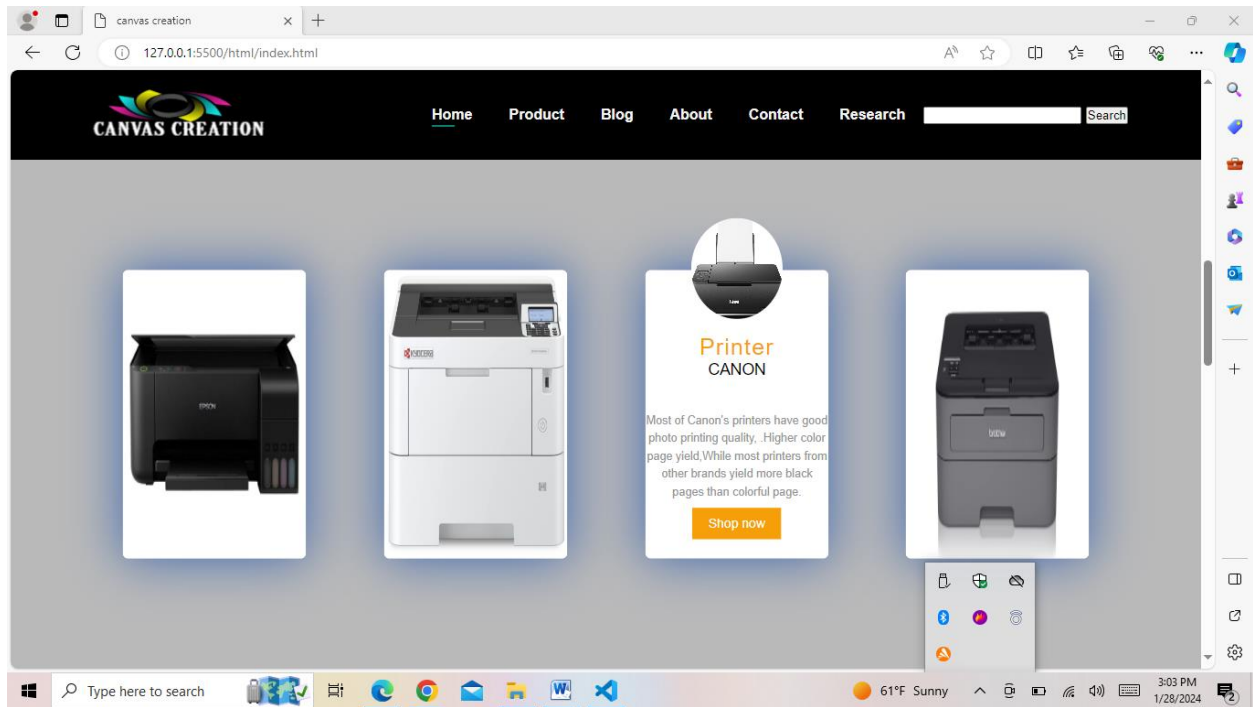

Figure 10:Output Test 3

3.4 Test 4

Test Number	4
Objective	This is the test for hover effect in home page
Action	Clicked the photo
Expected result	It shows text inside the photo
Actual result	Text was shown
Conclusion	Test Successful

Table 4:Test 4

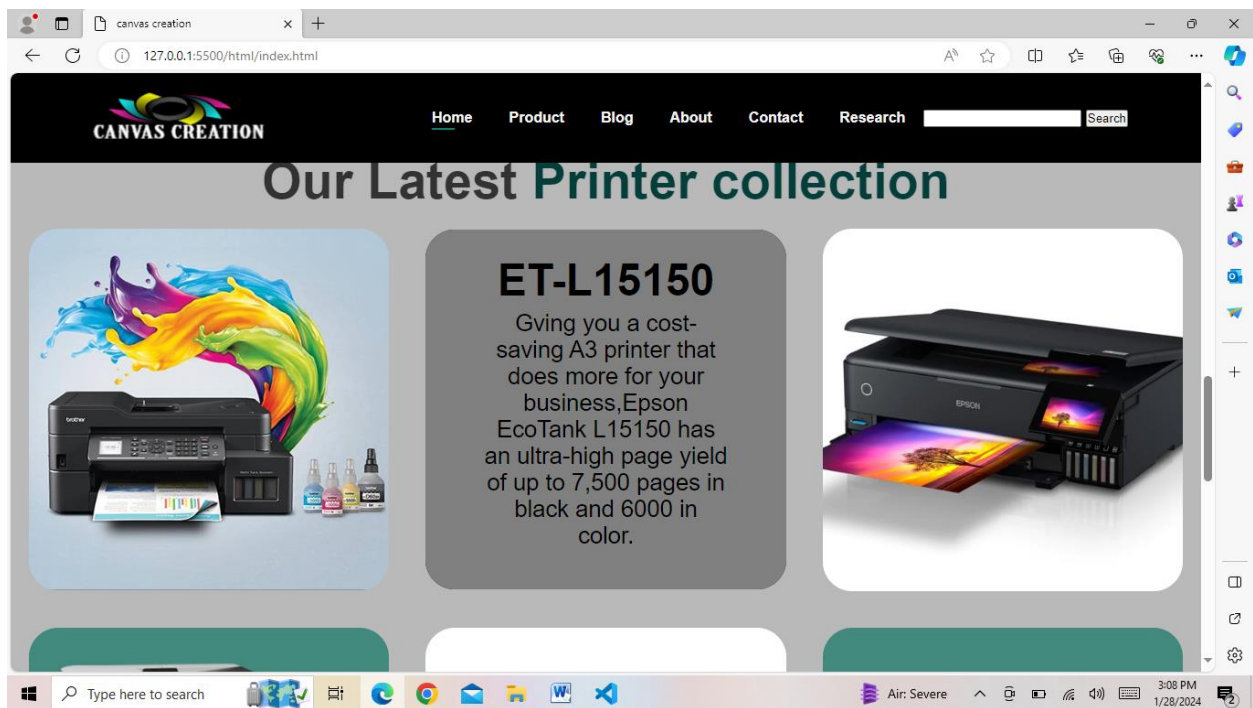

Figure 11:Output of Test 4

3.5 Test 5

Test Number	5
Objective	This is the test for footer
Action	Clicked the link
Expected result	It turn into red
Actual result	It turned red
Conclusion	Test Successful

Table 5:Test 5

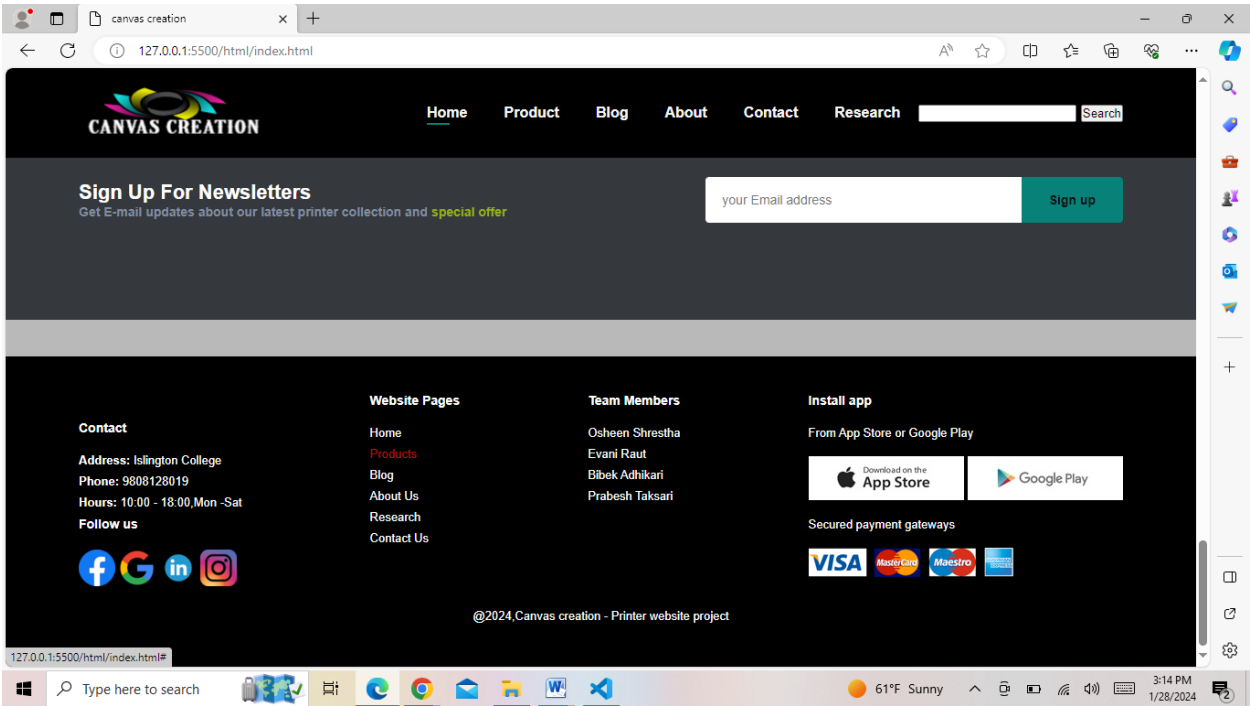

Figure 12:Output of Test 5

3.6 Test 6

Table 6:Test 6

Test Number	6
Objective	This is the test for footer and about us page
Action	Clicked the link
Expected result	After clicking we go into different page such as in cv and in facebook page
Actual result	We are in facebook page
Conclusion	Test Successful

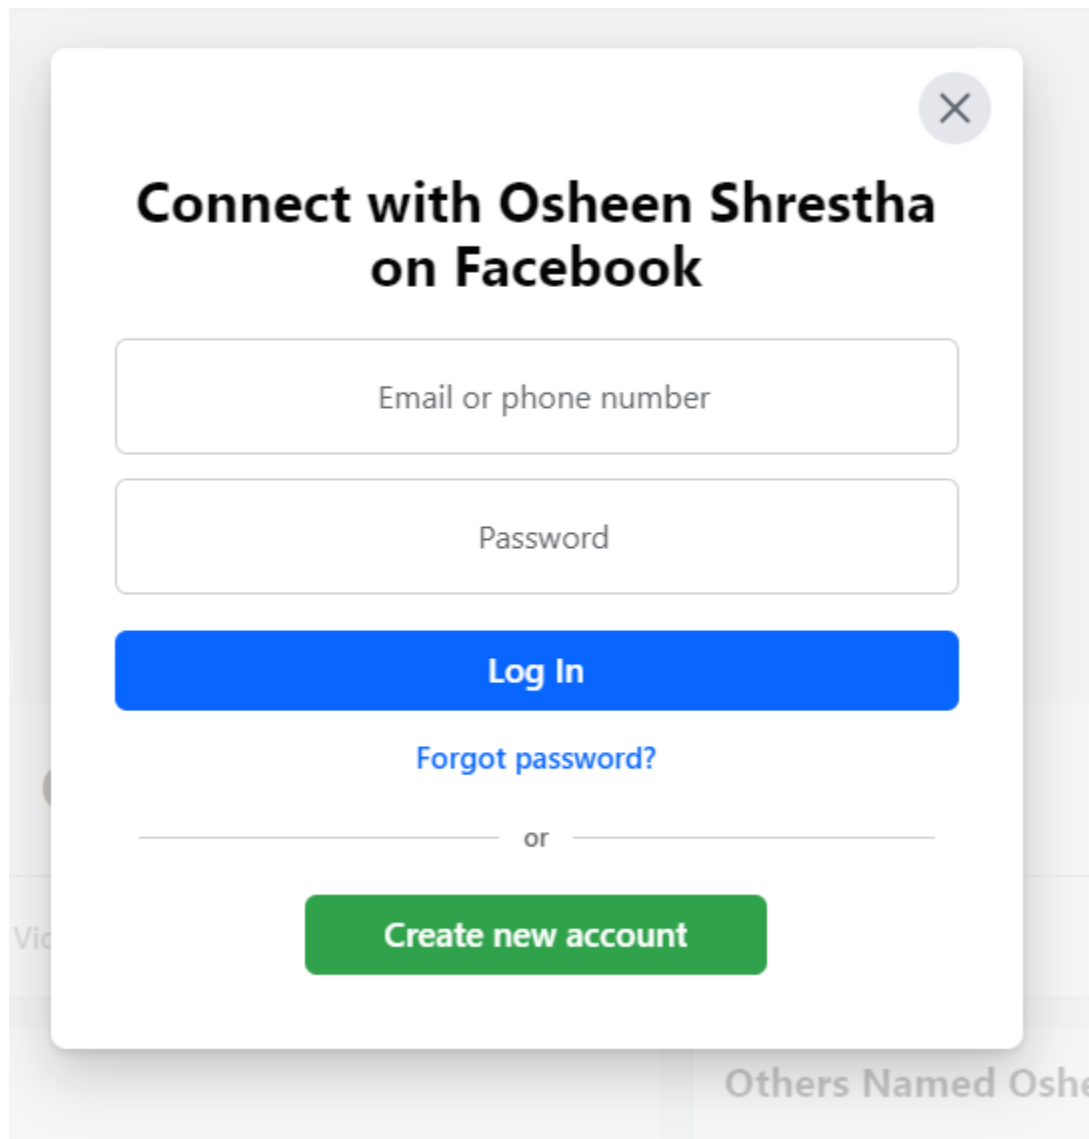

Figure 13:Output of Test 6

4.Conclusion

This is our online website where we sell various brand of printer .I really enjoy while making this website .My team member was also helpful .They helped a lot while making and creating this website with their skill and creativity. In the expanding online printer market, Canvas Creation is well-positioned to flourish as a leading e-commerce platform thanks to its emphasis on customer pleasure, dedication to sustainability ,and attention on security.

The team has also taken steps to guarantee that consumer data and transactions are safe since they appreciate the importance of security in e-commerce. This entails utilizing secure payment channels, implementing encryption methods, and conducting frequent security assessments. To make sure that customers' interactions with Printer are both fun and secure, the team is committed to safeguarding their privacy and security.

The website incorporates HTML, CSS, and JavaScript to give consumers an easy and quick way to make purchases. The website now caters mostly to Nepalese clients, but it may soon extend to other emerging countries.

At last we learned many things while making this website.It was totally new thing for us and quite challenging .We have to take lots of guidance from teacher and from different king of website .Thanks to our teacher who taught us in a very simple way so that we could understand .We are really satisfied with our work and from out result/output.

        <h4>Impact of technology on printing business</h4>
        <p>17 January,2024</p>
        <p>Technology has become the cornerstone of the revolution in
printing, influencing various aspects to increase efficiency and capabilities.
With its agility and versatility,...</p>
        <div class="content">
            digital printing technologies have enabled lower printing
costs and personalized content, changing the landscape of the industry.
Automation tools and workflow management
            systems simplify processes, minimize manual errors and
increase overall productivity. The advent of 3D printing has brought new
possibilities in prototyping and production and broadened

```

the horizons of the traditional field of printing. Color management software ensures accurate and consistent color reproduction, which is essential to maintaining brand integrity. Web-to-print

platforms simplify customer interaction, enable online job submissions, and improve overall workflow. Augmented reality (AR) and QR codes integrate digital elements into printed materials and offer

interactive experiences. Technology that promotes environmental sustainability has facilitated the adoption of green practices in the form of soy-based inks, energy-efficient devices, and recycled

paper. In addition, remote collaboration tools enable seamless interaction between print businesses and clients, supporting efficient proofing and design reviews. At its core, technology remains the

driving force that is constantly reshaping and optimizing the printing industry to meet the demands of the dynamic digital era.</p>

<h4>Impact of technology on our daily life</h4>

<p>10 January,2024</p>

<p>Technology has fundamentally changed our daily lives and left an indelible impact across different dimensions. Communication has been revolutionized by instant messaging,...</p>

<div class="content">

social media, and video conferencing that connect individuals around the world in real time. The Internet has democratized access to information and changed the way we learn, work and stay informed in the workplace, technology has introduced remote work, collaboration tools and automation, increasing productivity and flexibility. Education has seen a paradigm shift with online learning platforms and digital resources. In healthcare, technological advances have improved diagnosis, treatment and patient care, while entertainment has become immersive and accessible through streaming

services and gaming platforms. Smart devices ushered in the era of smart homes that allow you to control various aspects through connected devices. Social interaction has been redefined by social media, allowing connection and sharing of experiences across great distances. Transportation has evolved with electric vehicles, ridesharing, and navigation apps optimizing travel routes. Despite

these positive changes, challenges such as privacy concerns and the digital divide underscore the need for thoughtful consideration of the societal implications of technology in our daily lives. Balancing benefits with ethical considerations is critical as we navigate this ever-evolving technological landscape.</p>

<!-- Article about Buying Guides -->
<article>
    <h2>Buying Guides</h2>
    <!-- Content about printers and their types -->
    <p>Explore our buying guides to help you choose the right printer for
your needs.</p>
    <p style="font-size: x-large;">Introduction of printers</p>
    <p>A printer is a peripheral device designed to reproduce digital content
in physical form by transferring text, images,
        or graphics to paper or other media. There are different types of
printers that use different technologies to achieve
        specific printing requirements. Common types include inkjet
printers, which use liquid ink for high-quality color printing.
        Laser printer. It uses toner and laser beam for fast and accurate
black and white printing. A dot matrix printer that uses
        punching pins to create characters. Printers play an important role
in personal and professional settings, allowing us to convert
        electronic data into tangible documents, photos, and other physical
representations.</p>

        <p style="font-size: x-large;">- Types of printers</p>
        <p style="font-size: large;">Inkjet Printers</p>
        <ul>
            <li>It creates digital images by ejecting droplets of ink onto
paper or other media.</li>
            <li>It uses a print head that contains small nozzles,
                these nozzles spray tiny droplets of ink onto the paper to
create the desired image or text.</li>
            <li>The print head moves back and forth across the paper,
applying ink in a precise pattern to create characters or images.</li>
        </ul>

```

```
<p style="font-size: large;">Laser Printers</p>
<ul>
  <li>Laser printers use a laser beam to create an electrostatic
image on a photosensitive roller inside the printer.</li>
  <li>Laser printers are known for their high print speed, which
makes them suitable for high-volume printing.</li>
  <li>Laser printers excel at producing crisp, sharp text,
making them the preferred choice for business documents.</li>
</ul>

<p style="font-size: large;">LED Printers</p>
<ul>
  <li>LED printers uses an array of LEDs to create an image on the
drum or belt.</li>
  <li> The LED array is the printhead, and it is responsible for
creating the electrostatic image on the photosensitive drum or a belt.</li>
  <li> The LED technology allows for a more compact design of
the printers.</li>
</ul>

<p style="font-size: larger;">Dot Matrix Printers</p>
<ul>
  <li>Dot matrix printers are impact printers that uses a matrix of
small
    pins to create characters and images by striking an ink-
soaked ribbon against the pape .</li>
  <li>They are known for their durability and ability to work in a
harsh environments.</li>
  <li>They are suitable for tasks like creating duplicate
copies..</li>
</ul>

<p style="font-size: larger;">3D Printers</p>
<ul>
  <li>FDM, SLA, SLS, and DLP are common 3D printing
technologies.</li>
  <li>Used in prototyping, manufacturing, healthcare, aerospace,
and more.</li>
  <li>Ongoing progress includes multi-material printing and
faster speeds.</li>
</ul>
```

```

<p style="font-size: larger;">Wireless Printers</p>
<ul>
  <li>Print directly from smartphones and tablets.</li>
  <li>Simplified setup compared to wired printers.</li>
  <li>Use Wi-Fi or Bluetooth for cable-free connections.</li>
</ul>

<p style="font-size: larger;">Thermal Printers</p>
<ul>
  <li>Use heat to produce images on thermal-sensitive paper.</li>
  <li>No need for ink cartridges or toner, reducing operating
costs.</li>
  <li>Fast printing, durable output, often used for labels and
receipts.</li>
</ul>

<!-- Article about Websites Comparison -->
<article>
  <h1>Websites Comparison</h1>
  <!-- Content comparing your website with others -->
  <p>Comparison of other Websites with our website.</p>
  <p>Our website ensures an intuitive and user-friendly design, incorporating
easy navigation, clear menus, and a responsive layout to
  enhance the overall user experience. To optimize website performance, we
prioritize fast loading speeds, recognizing that slow websites can
  lead to frustration and higher bounce rates. We proudly showcase a
diverse and high-quality range of printers, highlighting unique features,
advanced
  technology, and superior build quality, all complemented by competitive
and transparent pricing. In addition, our website provides the added benefit of
  extended warranties and hassle-free returns, underscoring our
commitment to customer satisfaction. Security is paramount in online
transactions, and we prioritize
  it by displaying trust badges, implementing secure payment gateways,
and reassuring customers
  about the safety of their personal information. Offering excellent
customer support across various channels, including live chat, email, and phone,
is central
  to our commitment. Quick response times and effective problem resolution
contribute to a positive customer experience. Clear communication remains a key
element
  in building and maintaining trust.</p>

```

<p> Our active presence on social media serves to showcase social proof, such as the number of satisfied customers, growing social media followers, and positive comments on

various platforms. Maintaining this engagement allows us to connect with our audience effectively. Furthermore, positive customer reviews and testimonials are prominently

featured on our website, leveraging real user experiences to foster trust and credibility. </p>

<!-- Article about Tools used in your website -->

<article>

<h1>Tools used in our website</h1>

<!-- Content about HTML, CSS, and JavaScript usage -->

<p>HTML</p>

<p>In the coursework on developing a eShop for printers, HTML is used as a primary web coding language. HTML, or Hypertext Markup Language, provides a structured and necessary foundation for creating eShop websites.

It allows to define the structure and content of the pages,

including elements such as headings, paragraphs, lists and images. HTML tags were used to organize information such as printer specifications,

prices and images in a clear and coherent way. In addition, HTML allows the creation of interactive elements such as buttons and forms, making

it easier for users to engage with the eShop platform. By harnessing the power of HTML, we can ensure a standardized and accessible presentation

of print products, contributing to a seamless and user-friendly online shopping experience for customers visiting the eShop. </p>

<p>CSS</p>

<p>For developing the coursework for a printer eShop, Combination of inline, external, and internal CSS were strategically employed to enhance the presentation

and user experience of the website. Inline styles were utilized for specific elements where immediate styling was required, allowing to tailor the appearance of individual components within the HTML document. For a more organized approach, internal styles were embedded in the HTML head section, enabling me to define

consistent styling for various elements throughout the eShop. Additionally, external styles proved invaluable in maintaining a cohesive design across multiple pages.

By creating a separate CSS file linked to the HTML documents, I ensured a streamlined and easily maintainable structure for the entire printer eShop project. This

approach not only facilitated efficient coding but also allowed for a modular and scalable design, contributing to

```
    a visually appealing and user-friendly online shopping experience for
    customers exploring the printer eShop.</p>
<p>Javascript</p>
<p>In the development of the coursework focused on a printer eShop, JavaScript
    played a pivotal role in adding dynamic functionality and interactivity to
    the website. Leveraging JavaScript, We implemented features such as product
    filtering based on user preferences, dynamic content updates without page
    reloads,
    and form validation to enhance the overall user experience. Through event
    handling and DOM manipulation, we ensured seamless interaction with the eShop,
    allowing
    users to effortlessly navigate product categories and access detailed
    information. Furthermore, JavaScript facilitated the integration of secure
    payment gateways
    and real-time updates on product availability. By incorporating this
    versatile scripting language, we aimed to create a responsive and engaging
    printer eShop that not
    only showcases products effectively but also provides a user-friendly
    interface for an optimal online shopping experience.</p>

<!-- Article about Reference Websites -->
<article>
    <h3>Reference Websites</h3>
    <!-- List of reference websites with comments about each -->

    <ul>
        <li><a href="https://www.daraz.com/" target="_blank">Daraz</a></li>
        <p>- For product page</p>
        <p>In the development of our printer eShop, we drew inspiration from the
design and
        functionality of the Daraz website, a prominent eCommerce platform.
The layout and categorization
        of products on Daraz influenced our decision to organize printer
models in a clear and structured manner,

```

```

        allowing customers to easily browse through various categories.
Additionally, we incorporated a similar approach
        to displaying product details, aiming to provide potential buyers
with thorough specifications and features. While
        our website maintains its unique branding and features, the
influence of Daraz's effective design principles played a pivotal role in
optimizing the user
        experience on our printer eShop's product pages.
    </p>
    <li><a href="https://www.amazon.com/electronics" target="_blank">Amazon
Electronics</a></li>
    <p>- For home page</p>
    <p>In shaping the home page of our printer eShop, we looked to the Amazon
Electronics website as a source of inspiration for creating a dynamic and
engaging online
        shopping experience. Drawing from Amazon's emphasis on simplicity
and accessibility, we implemented a clean and intuitive design that allows users
to quickly
        navigate through featured products and promotions. Furthermore, we
borrowed from Amazon's approach to personalization, integrating tailored product
recommendations
        based on user preferences. While our home page maintains its unique
identity and branding, the influence of Amazon Electronics is evident in our
commitment to providing
        a seamless and customer-centric introduction to the diverse range
of printers available on our eShop.
    </p>

    <li><a href="https://www.usa.canon.com/internet/portal/us/home"
target="_blank">Canon USA</a></li>
    <p>- For signup page</p>
    <p>In the development of the signup page for our printer eShop, we turned
to the Canon website as a source of inspiration for crafting a secure and user-
friendly authentication
        experience we implemented a straightforward sign-in process that
prioritizes user convenience and security. While our sign-in page retains its
unique branding, the design principles
        borrowed from Canon contribute to a cohesive and intuitive user
experience, aligning with our goal of providing a reliable and user-friendly
platform for our customers.</p>
</ul>
